## Wise precautions are important

As a condition of cover we may ask you to anchor the structure at all corners of the chassis (we waive this requirement during the first four weeks of cover to allow time to complete). Between 1st November and 15th March, when unoccupied the water should be turned off at the mains and all equipment fully drained, or a central heating system set. You would not be covered for the first £500 of any claim resulting from burst pipes, escape of water, flood, storm or tempest during this period unless these winter weather precautions are taken.

## Important – Duty of Disclosure

It is your responsibility to provide complete and accurate information to insurers when you take out your insurance policy, throughout the life of the policy and when you renew it. It is important you ensure that all statements you make in any telephone call or correspondence, on any claim form or other documentation are full and accurate. Please note that if you fail to disclose any material information or changes of circumstances to your insurers, this could invalidate your insurance cover and could mean that part or all of a claim may not be paid. You should keep copies of all correspondence in connection with this insurance.
